## RESEARCH INTEREST

My research interests lie into exploring how Large Language Models tackle RHETORICAL ANALYSIS, especially in conversations. I am interested in probing the three verticals of rhetoric: ETHOS, PATHOS, and LOGOS. For ETHOS, I'm excited to examine how cultural values, credibility, and trust shape dialogues. With PATHOS, I'm keen on understanding how emotions are managed and expressed in LLM interactions. And for LOGOS, I wish to analyze how these models craft and navigate logical arguments.
